

Environmental Impact Statement

AMS embraces environmental awareness and exhibits a commitment to the cause through employee awareness, facilities management and process sensitivity.

Employee Awareness:

AMS partners with service providers who exhibit the same conscientious concern for the environment that the firm promotes internally. Choosing travel vendors, hotel chains and other collateral service organizations that also support environmental awareness campaigns is a best practice we embrace with commitment. AMS also promotes these best practices to our staff, serving as an extension into the community.

Facilities Awareness:

AMS home offices reside in an environmentally friendly building which has been refit to comply with all current energy standards and utility conservation.

Process Sensitivity:

AMS is a paperless office in addition to upgrading all technology equipment to comply with energy saving best practice.

In summary, we consider ourselves to be an environmentally friendly corporate citizen.
