

# Best Practice

**Service:** Consulting  
**Solution Suite:** Business Analysis  
**Best Practice:** Enterprise Methodologies

## Overview

AMS deploys solutions based on customized industry and experiential best practice. Our team of executive level consultants will work with your organization to craft the best implementation of any service, solution suite, and correlating best practice. This holistic approach to creating business solutions will render high value ROI, continuity, and embedded value.

AMS can help your organization establish best practice methodologies to drive the Business Analyst (BA) competency and processes throughout the enterprise.

Leading organizations are embracing BA as a set of practices and competencies to leverage their existing project management methods. Because AMS has an established project management competency we are able to merge existing process with the BA function saving effort and creating a more seamless implementation.

AMS can customize any best practice to fit your organizational needs.
