

Best Practice

Service: Consulting
Solution Suite: Business Analysis
Best Practice: Scope Development

Overview

AMS deploys solutions based on customized industry and experiential best practice. Our team of executive level consultants will work with your organization to craft the best implementation of any service, solution suite, and correlating best practice. This holistic approach to creating business solutions will render high value ROI, continuity, and embedded value.

Leveraging our data gathering and communication competencies we can help refine project scope within a Business Analyst (BA) environment.

AMS consultants will work with your team to ensure all of the customer's requirements are captured, refine deliverables, communicate push back strategies, change management protocols, and stage gate measurement criteria.

An AMS scope document leverages best practice methods that help to set a baseline for the client moving forward.

AMS can customize any best practice to fit your organizational needs.
