

# Best Practice

**Service:** *Consulting*  
**Solution Suite:** *Project Management*  
**Best Practice:** *Capital Projects*

## Overview

AMS deploys solutions based on customized industry and experiential best practice. Our team of executive level consultants will work with your organization to craft the best implementation of any service, solution suite and correlating best practice. This holistic approach to creating business solutions will render high value ROI, continuity and embedded value.

Capital Project Management includes the Engineering Procurement, and Construction (EPC) practices and processes required to plan, design, execute, close and control Capital facility development efforts.

Our senior consultants have 25 years plus in the domestic and international Capital Project arena assisting small and large organizations to develop scaled approaches to Front-End Loading (FEL) and Project Execution-Control.

AMS consultants have assisted with multi million/billion dollar efforts around the globe with our clients realizing sustainable and value based results.

All AMS consulting, training and assessment programs align with; Project Management Institute (PMI), Association for the Advancement of Cost Engineering (AACE), Construction Management Association of America (CMAA) and the Construction Industry Institute (CII).

AMS can customize any best practice to fit your organizational needs.
