

Course Description

Life Cycle Compression for Accelerated Projects AMS1011

*7 Professional Development Units
7 Education Hours*

Overview

Unfortunately, not all projects have the luxury of a full and complete planning cycle. In order to capitalize on opportunities, organizations must be able to successfully condense the traditional project life cycle while managing the inherent risks of doing so. This one day session will focus the participant on the critical success factors and best practices of accelerated project efforts and managing the effects of life cycle compression.

Learning Objectives

- Understand the distinctions of accelerated project efforts
- Understand the effects of concurrency on accelerated projects
- Understand the minimal critical success factors of accelerated projects
- Understand the best practices and tools for successful execution of accelerated projects

Format

The course is highly interactive and adaptive to class interests and needs. A lecture/discussion approach is used and is accompanied by individual and team exercises on participant projects.

Duration

One day

Who Should Attend

Project managers, team leaders, and team members in accelerated and “quick-burst” project environments would benefit by taking this course.
